

Tricks to Write HTML & CSS 10x Faster

What is Emmet?

Emmet is a web-developer's toolkit that can improve your HTML & CSS workflow 10× faster.

In this post, I have explained few Emmets.

Child>

```
table>tr>td
```

```
<table>
  <tr>
    <td></td>
  </tr>
</table>
```

Multiplication*

Multiply any element or tag by using asterisk (*) followed by number of times you want to replicate it.

```
ul>li*3
```

```
<ul>  
  <li></li>  
  <li></li>  
  <li></li>  
</ul>
```

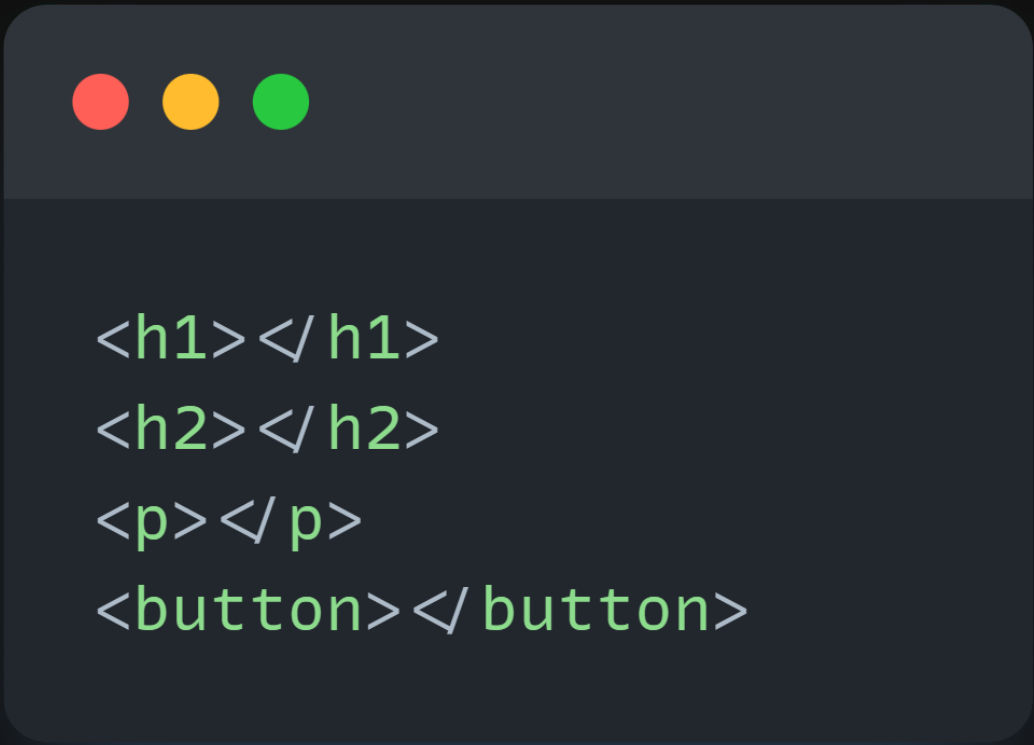

Siblings +

To add tags one followed by the other, use plus (+) sign.

A dark gray rounded rectangle with three colored circles (red, yellow, green) at the top left. Inside, the text `h1+h2+p+btn` is displayed, where the plus signs are red.

```
h1+h2+p+btn
```

A dark gray rounded rectangle with three colored circles (red, yellow, green) at the top left. Inside, the following HTML tags are listed, each on a new line: `<h1></h1>`, `<h2></h2>`, `<p></p>`, and `<button></button>`. The tags are green.

```
<h1></h1>
<h2></h2>
<p></p>
<button></button>
```

Grouping ()

Group specifies tags using braces ()

```
(table>tr>td)*2
```

```
<table>
  <tr>
    <td></td>
  </tr>
</table>
<table>
  <tr>
    <td></td>
  </tr>
</table>
```

Climb Up (^)

Enables climbing of tags above tags, use caret (^) symbol.

```
table>tr>td^^ul>li
```

```
<table>  
  <tr>  
    <td></td>  
  </tr>  
</table>  
<ul>  
  <li></li>  
</ul>
```
